MEMORANDUM FOR: Director, National Foreign Assessment Center
FROM: Director of Central Intelligence
SUBJECT: America's Industrial Plant

Fred Ikle is undertaking a review of America's industrial plant and its ability to carry an increased defense effort. Part of this involves the question of dependency on foreign sources arising from the purchase of foreign components by U.S. defense contractors. Part of it is the acquisition by foreign interests of U.S. corporations having capabilities essential to our defense. Ikle would like intelligence support on this undertaking and would like to come over in a couple of weeks to brief selected analysts who may have intelligence contributions to make in this effort. His purpose would be to acquaint us with what Defense is doing and to define the kind of intelligence analysis and production which would contribute to its objective.

for William J. Casey
